

Innovation via meaningful connections

PLDN Sponsoring Packages

Participate in PLDN and support the recognition and application of crucial technology

PLDN in short

The aim of the Platform Linked Data Nederland is to bring knowledge about and the use of linked data to a higher level at the relevant parties.

The past 6 years have been very successful; good results and a lively community that shares knowledge and explores application possibilities.

The aim now is to deepen the themes and broaden them to other domains such as construction, healthcare and culture.

The platform has an open structure: everyone can participate and submit topics.

In addition to the 3-6 annual large gatherings (50-200 visitors) - always held at organizations that are actively engaged in linked data - there are smaller events.

These are organized in, among other things, the 'clubhouse' the Big Data Value Center.

There are also many extra sessions / demos and lectures organized spontaneously. There are close links with science and the platform is also well anchored in Europe with a link to W3C and OGC.

The Big Data Value Center clubhouse in Almere in addition to event space also offers an experimental environment. On this server are several databases and so-called triple-stores, which are available to everyone. Besides this, various publications are published by the platform and there is a newsletter.

For announcements and substantive discussions, there is the active LOD Netherlands group on LinkedIn.

Finally, working groups form an important and successful part of PLDN. In working groups, a specific theme is discussed, related to Linked Data. For example, reference data, standards, cultural heritage or linked beer.

PLDN offers you the opportunity to join the platform as a sponsor and to support these activities.

There are three packages:

Sponsor package Bronze

Benefits:

- Logo and name listing on the PLDN website as a sponsor;
- Mention as a sponsor via the Social Media platform;

Steering group member

In addition to a choice for the above sponsor packages, it is also possible for companies to join the steering group. This offers the opportunity to talk about the strategy and activities of PLDN. Costs of steering group membership for companies amount to € 10,000. Participants in the steering group are expected to actively involve their network and facilities.

Sponsoring conditions

PLDN is an open, non-profit-making community. A number of conditions result from this.

- Sponsorship is non-exclusive; sponsors accept that in principle every company can become a member, including competitors.
- Sponsorship supports the purpose of PLDN; increasing knowledge and the use of linked data is the goal, PLDN is not a tool for direct acquisition or advertising.

If you are interested to participate as a sponsor or steering group member you can contact Hans van Bragt Hans.vanBragt@bdvc.nl
