# The beer application

# The beer application : Functionality

- Check in a beer
- Review a beer
- Make friends
- Make groups

# Link to beer app

<https://ozcansaker.github.io/Social-linked-beer>

**Conceptually  
good and bad  
things Solid**

# The bad

- All user data in one place
- High learning curve user
- Decentralized nature

# The good

- App data with the user
- All user data in one place
- No backend
- Better security
- Solid is flexible
- Permission control is thought out well

**Other problems**

# Other problems

- Copying of user info
- Access shielding
- Finding resources on the web is a problem

**The future**

# Solid has to grow

- Keep to community growing
- Improve usability
- Keep the application ecosystem growing
