

PiLOD LOD Service

Heeft u een dataset? Mogen wij het Linked en Open maken?

Goal: to promote the use of Linked Data in the Nederland

From no-star data

to 5-star data

Some issues

- Little response
- Gap between “service to convert a small set of sample data” and “service to solve complex information problems”.
- A lot of open data (see: data.overheid.nl), but little intension to convert this to 5-star data
- We might need 6-star data?? (Linked data over API's)

A great example (that works)

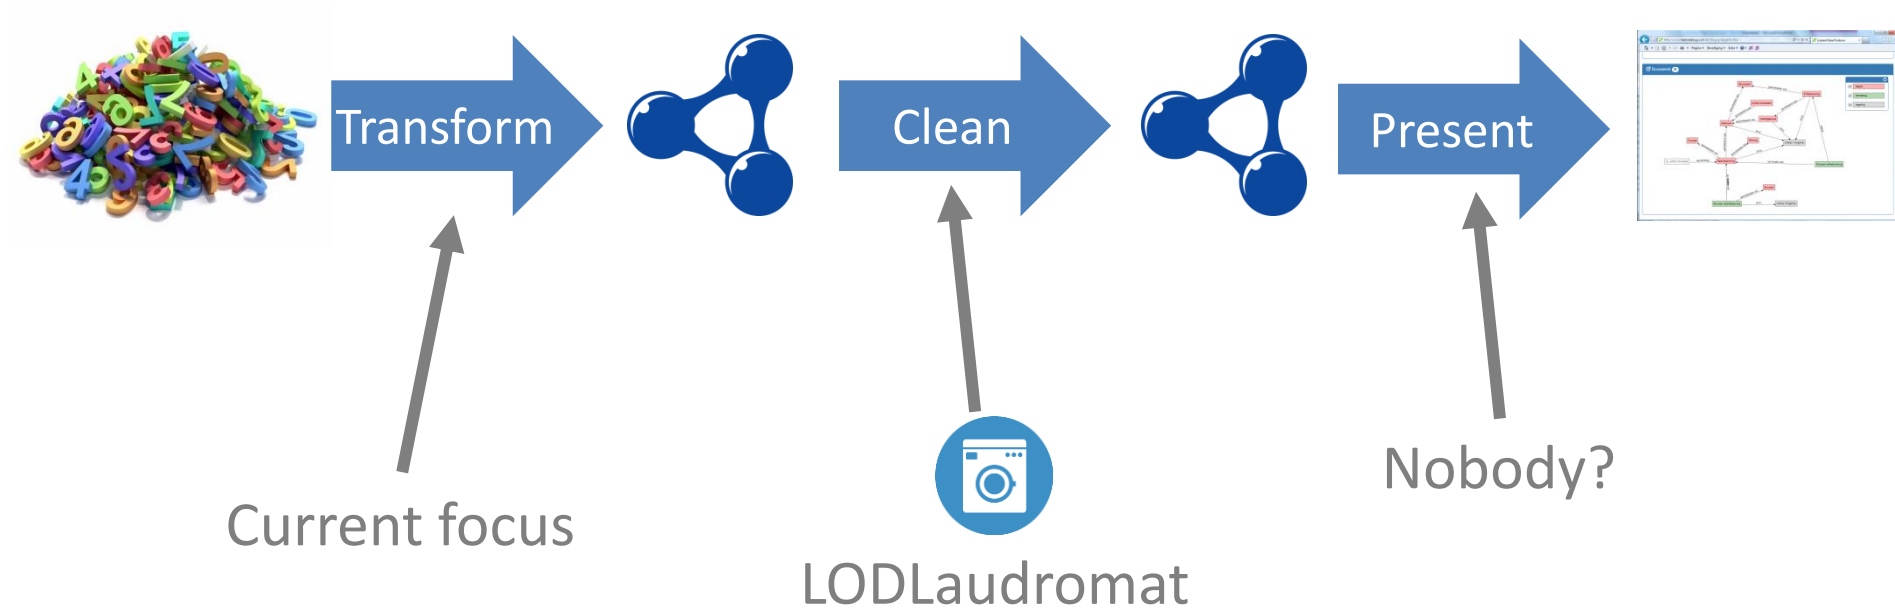

LOD Laundromat

The LOD Laundromat provides access to all Linked Open Data (LOD) in the world. It does this by crawling the LOD cloud, and converting all its contents in a standards-compliant way (gzipped N-Triples), removing all data stains such as syntax errors, duplicates, and blank nodes.

But:

- Data should already be linked data

What is need to promote linked data?

Presenting linked data

Wat we have

- The LinkedIn community
- The almere.pilod.nl platform
- The pilod.nl wiki
- These workshop meetings
- Little spare & free time

We might need something else?

- A cookbook “how to make linked data”?
- A challenge (hackaton?) to make all open data of the government 5 (or 6) star linked data?
- A marketplace?
- ?
