A painting of a Dutch sailing ship, likely a galleon, with a prominent golden gun turret on the deck. The ship is shown from a low angle, looking up at the masts and sails. The background is a hazy, light-colored sky. The overall style is that of a historical painting.

Dutch Ships and Sailors

Why Linked Data

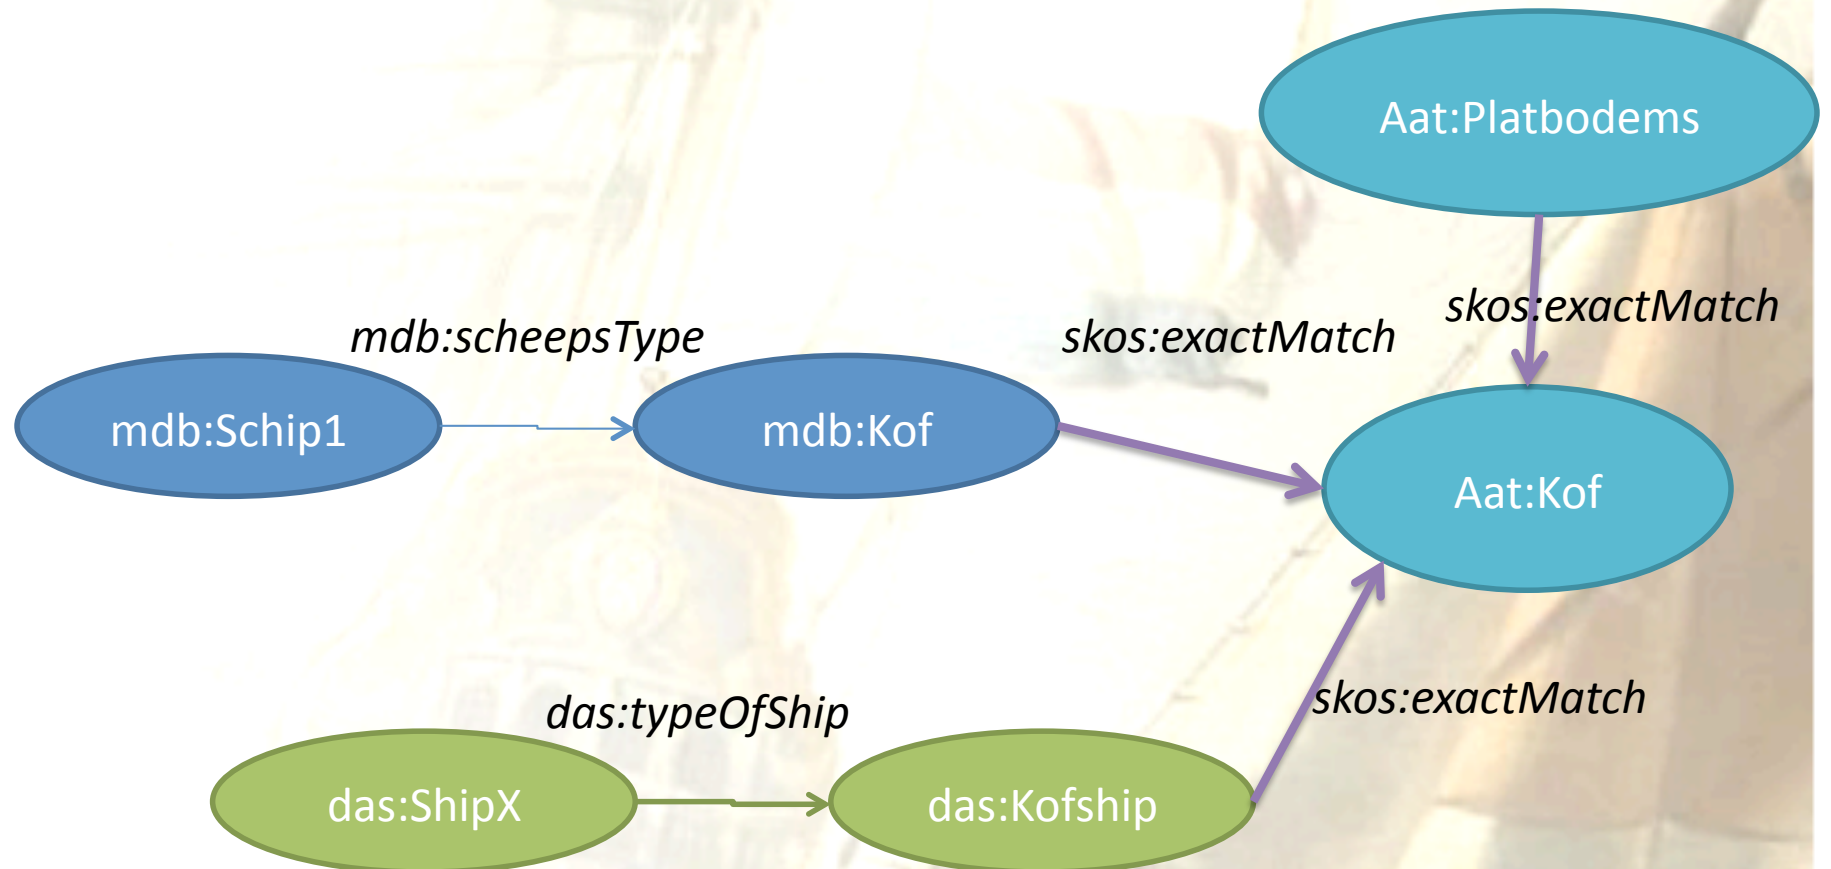

- Heterogeneous models, one dataformat
 - Link what can be linked
- Keep specificity, allow integration at project level
- Links to other sources: re-use knowledge

- Extensible
- Allow multiple levels of semantic enrichment/
normalization
 - through Named Graphs
 - Provenance

Integrate metadata (properties)

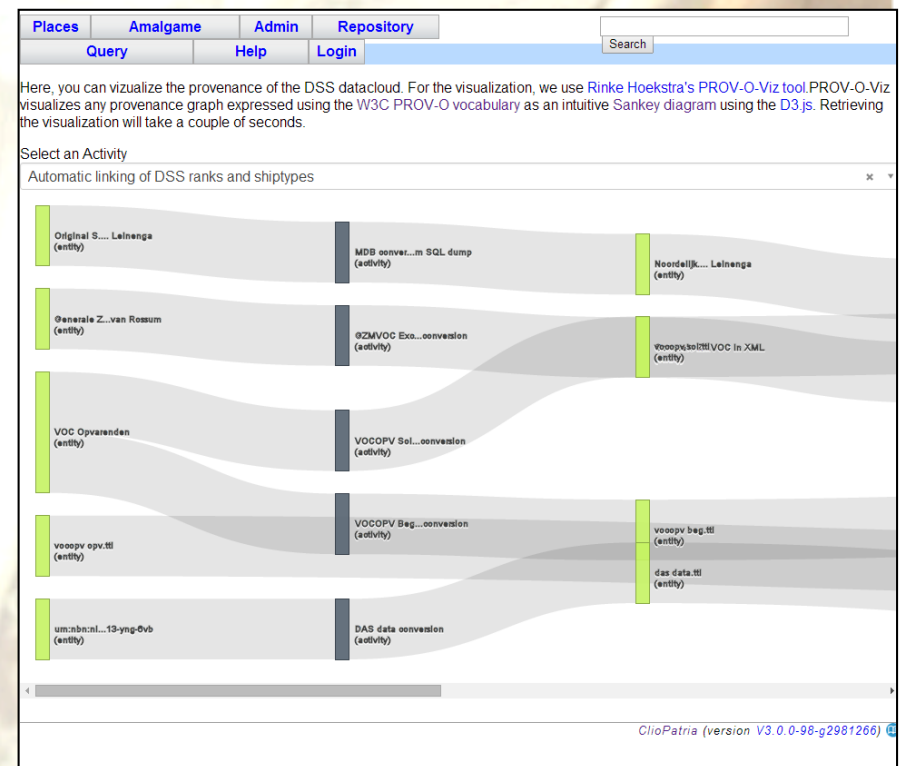

Link to other datasets

Provenance

- Individual *named graphs* have provenance information
 - Who made it (people/software?)
 - Based on what source
 - Content confidence

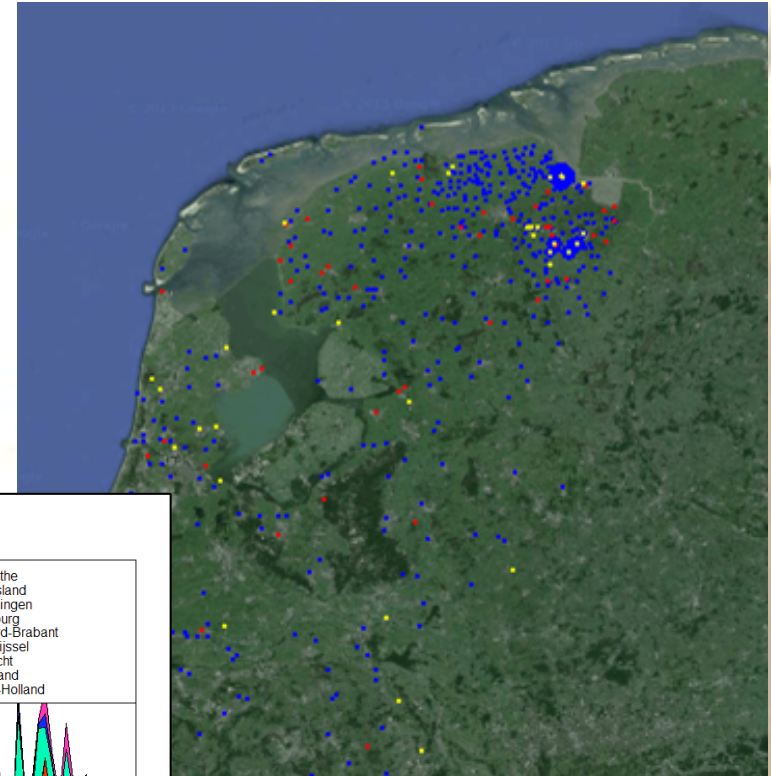

Data analysis and visualisation

Use the textarea below to fire a SPARQL query at the DSS triple store. You can choose to adapt that query if needed before launching it.

Select Query

Select Query

Find all mdb aanmonsteringen that have a ship and a captain with the last name "Boer"
Give me all ships (across datasets) with the name "Johanna"
Find all mdb aanmonsteringen, and list the last name of the captain of the ship
Find things in DAS and GZMVOC that match the same place in Geonames
Find things in 3 datasets that match the same place in Geonames and also give me the lat/long
Places where DAS ships have been
Linked newspaper articles for MDB brikken heading to RIGA
