

Music Lists Project

Upgrading Muzieklijstes.nl to 5★ Linked Data

John Walker <<u>mailto:john.walker@semaku.com</u>> Hans van Duijnhoven <<u>mailto:hd@nobb.nl</u>>

Introduction

What are music lists?

- Music lists are (typically) about albums (not singles)
- Compiled by musical professionals
- Mostly once a year
- Usually published in December
- And sometimes during the year (for instance the best soul albums of all time)
- Sources: musical periodicals, newspaper incidentally, the internet
- Countries: the Netherlands, Belgium, UK and the USA
- Is a curated selection (e.g. no lists from Poland, Germany or Hungary)

How is the data gathered?

- Hans buys or obtains a copy of publication
- Manually enter relevant data in an Excel-sheet
- From there data for a list is converted into a static HTML page
- Lists captured dating back to 1970

Three kinds of lists

- gp lists with no order, therefore they are presented in alphabetical order
 (on the name of the group OR the last name of the artist for instance Bowie,
 Cash or Dylan and not David, Johnny or Bob) (gp = geen positie/no position)
- 2. **pos** lists where **number 1 is 'better' than number 50** (**pos** = position)
- 3. **ak** lists where it is possible to calculate how many individual list-makers voted for a specific record and on which position (mostly 1-10 or 1-20) (**ak** = aantal keren / number of times)

List 1 - gp - geen positie - alphabetical order

- At the moment: 450 lists
- An unordered list of albums
- Usually presented in some sorted order e.
 g. by artist name, or album title

Ty Segall Manipulator Drag City

After several years firing off in myriad directions on countless releases and side-projects, San Francisco firebrand Segall focuses for a breakthrough album fusing freakbeat psychedelia with buzz-toned garage-punk and a prodigious pop sensibility.Light on its feet and heavy on tunes, thrills and noise, Manipulator announces Tv's time as now. Sharon Van Etten Are We There

Love and confessional songwriting are dangerous games: on her fourth album, Van Etten at least wins one of them. Catharsis without purge overkill, Are We There finds the Brooklynbased singer mapping out complicated lives. between coordinates of violent despair and dazed hopefulness, A trip to the dark places that never loses the line of the songs, VS

Julie Byrne Rooms With Walls And Windows

Orindal

The first long-playing collection from this Buffalo, New York singer-songwriter was possibly the quietest release of the year, but also one of the most lasting, her softly-sung acoustic tales of love, loss and longing possessing the ability to warm rooms and break hearts. AM

St. Vincent St. Vincent

Loma Vista/Republic
The transformative

theme and cinematic quality that runs through St. Vincent's fourth album pegs it as her best: from the cover which sees Annie Clarke as a futuristic queen, to the paranoid, jittery funk of the music through to the characters who populate the album's greatest songs, drifting from illusion to illusion. It's an intense, unpredictable ride. PE

The "Muziekcanon"

- A canon is "a collection or list of sacred books accepted as genuine"
- Hans has selected 165 lists for the canon
- Lists that span a broader period, style or genre
- The register counts and delivers an aggregated list: the muziekcanon
- At the moment a list with 2211 records
- #1 Never mind the bollocks, here's the Sex pistols

Other features -

- # indicates an album that is not made by a single person or group
 - Tribute CD
 - Soundtrack
 - Compilation album with different artists
- In alphabetical lists these albums come first
- #s (soundtrack) and #trib (tribute album)

Excel input

Multiple worksheets

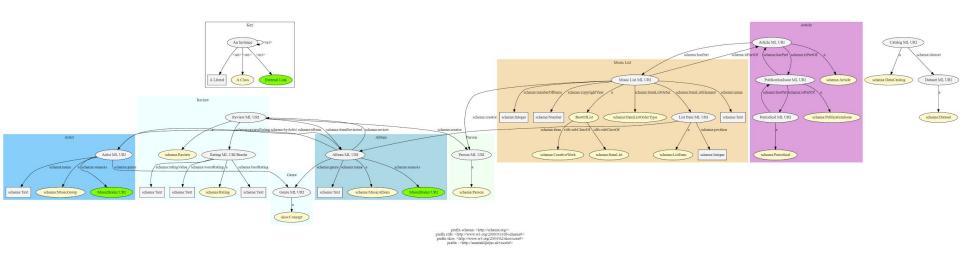

- 1. The main body
- 2. Explanation of the lists
- 3. Explanation of the sources
- 4. Explanation of the music list-makers, reviewers, people who participate
- 5. Lists of sections in magazines (Play, Play Reissue)
- 6. Separate file for OOR (ak-lists)

Priorities for a new system to manage the data

- 1. Unique record for artist and title
- 2. Manage music lists **and** reviews in magazines
- 3. Convert to RDF and publish as Linked Data
- 4. Make UI something like the current Register
- 5. Only the order has to be reversed (first show the lists and then the reviews)
- 6. Link with other data OR import data from other sources
- 7. Always refer to the static HTML-pages. Only ...
- 8. These have to get a new template
- 9. Hans doesn't mind stopping with Excel and start with a new system

ETL process

- Convert XLS to CSV
- 2. Search for MusicBrainz matches via search API
- 3. Convert CSV to Turtle using TARQL
- 4. Convert TTL to JSON-LD and N-Triples using RDFLib
- 5. Upload JSON-LD to MongoDB
- 6. Upload N-Triples to Cubiss RDF store (Virtuoso)

Implemented in Python for use via Command Line Interface

MEAN stack

MEAN is an acronym for Mongo, Express.js , Angular.js and Node.js

MongoDB - JSON document store

Express - server-side web application framework for web & mobile apps

AngularJS - client-side single-page application framework for web & mobile apps

Node.js - cross-platform runtime env for developing server-side web apps

Project Review

Evaluation

- Project successfully delivered
- Slight delay due to personnel issue
- Time spent
 - Developer 30 days
 - Project lead 3 days

Possible next steps...

- Make GUI to edit the data
- Add an open licence
- Add reviews
- Use more data from external sources
- Improve/optimize application performance
- Improve data quality
 - Provide possibility for users to give feedback
 - Correct source data in Excel
 - Refine the matching algorithm
 - Add missing albums and artists to MusicBrainz
