NETAGE

W3C®

History

Linking Geospatial Data workshop

- 5th - 6th March 2014, Campus London, Shoreditch
- *Negotiations between W3C/OGC*

Working group

- December 2014: First teleconference
- March 2015 first Face 2 Face meeting

Charter

- Use Cases and Requirements.
- **Spatial Data on the Web Best Practices**
- Time Ontology in OWL
- Semantic Sensor Network Vocabulary
- Coverage in Linked Data

Why ?

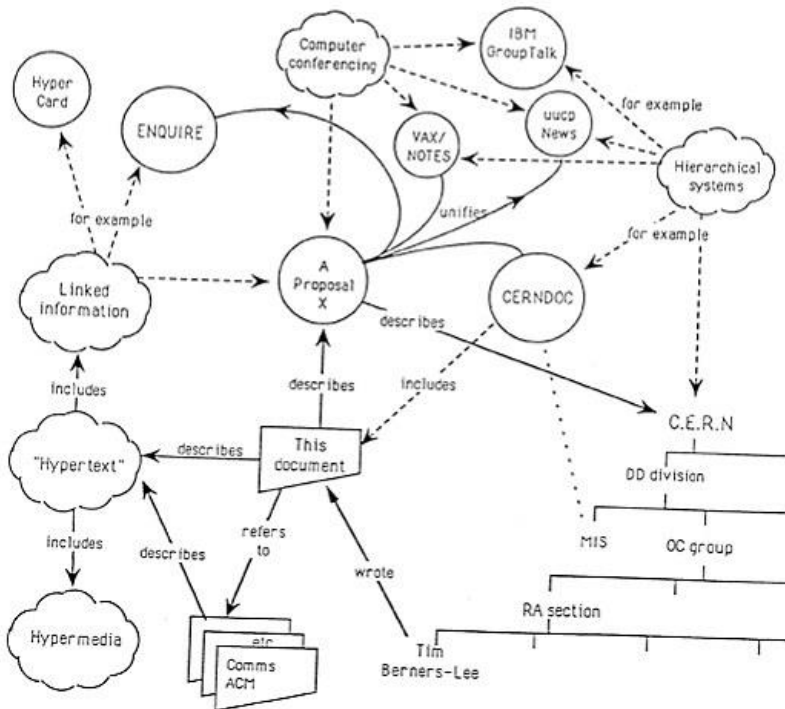

Information Management: A Proposal

Abstract

This proposal concerns the management of general information about accelerators and experiments at CERN. It discusses the problems of loss of information about complex evolving systems and derives a solution based on a distributed hypertext system.

Keywords: Hypertext, Computer conferencing, Document retrieval, Information management, Project control

Linked Data uses the concepts and technologies of the Web to describe the world. (no acronyms, no tech terms, one tweet)
